

Audio/Video Series

Distribution Amplifiers

Extron Electronics
INTERFACING, SWITCHING AND DISTRIBUTION

SERIES APPLICATION

Extron's series of Audio/Video Distribution Amplifiers have been developed for the professional A/V market to meet specific system requirements in distributing multiple outputs from a single input. Extron has designed each series to provide signal distribution & amplification for either Composite Video; S-Video; Stereo Audio; or Stereo Audio with Composite Video. All of the video DAs are compatible with NTSC, PAL and SECAM and the audio DAs provide balanced & unbalanced stereo distribution.

This line-up of A/V distribution products allows increased system flexibility and performance at an extremely competitive price. These professional quality distribution amplifiers (DAs) can be used in many types of corporate, educational, military or consumer installations to optimize the audio and video routing and performance within a system.

The different models listed here allow for a variety of audio and video signal types to be distributed with six outputs for every one input. Each of the video channels are designed with individual buffers and amplifiers, which means that all output channels are equivalent in terms of signal strength and integrity to the original input signal.

SERIES FEATURES

All models are housed in Extron gray 1U (1.75 inch height) metal enclosures and are rack mountable. An internal switch mode, 100-240 volt power supply, is also standard which allows use of a common IEC power cord and can be used anywhere in the world. Each of the audio channels utilize captive screw terminal connectors and are designed to accept balanced or unbalanced stereo for maximum performance, flexibility and ease of installation. Also, the *Dual* versions allow for two separate video and/or audio sources to be distributed within a single unit, and the *Quad* versions allow for four separate video and/or audio sources to be distributed within a single unit- thus eliminating the need for multiple DAs when distributing several inputs.

This line of products is ideally suited for audio visual systems which require professional quality signal distribution. With the addition of these A/V products to an already extensive product line, system designers, integrators and end users now have greater flexibility than ever for developing the perfect solutions to their distribution needs.

SAMPLE CONFIGURATIONS

AV DA 6 MX SERIES

The two Audio and Composite Video Distribution Amplifiers in this series are the AV DA 6 MX and AV DA 6 MX DUAL. Both of these products are compatible with balanced or unbalanced stereo audio as well as with NTSC, PAL or SECAM devices such as LaserDiscs, VCRs, cameras, etc. Signals are split into six different, independently buffered and amplified, outputs and driven up to 150 feet (45 meters).

The AV DA 6 MX provides one input and six outputs of both two channel Stereo Audio & Composite Video. The AV DA 6 MX DUAL provides two separate-one input, six output, stereo audio (two channel) & composite video distribution amplifiers in one enclosure. Both the AV DA 6 MX & AV DA 6 MX DUAL are rack mountable. The AV DA 6 MX is 1/2 rack width and the AV DA 6 MX DUAL is at one full rack width; both are 1U high.

APPLICATION DIAGRAM - AV DA MX & DUAL

FEATURES

- Video Input Level: .5 - 2 Volts p-p
- Video Bandwidth: 30 MHz (less than $\pm .5$ dB)
- Inputs and outputs each use professional female BNC connectors for 75 Ohm impedance levels
- Audio Frequency Response: 20 Hz to 20 kHz
- Impedance: High Z
- Capable of distributing balanced or unbalanced audio signals

- Utilizes 5 conductor captive screw terminal connectors (3.5 mm) for audio inputs and outputs
- Metal Enclosure/Internal 100-240 Volt auto-switchable power supply
- Rack Mountable

SPECIFICATIONS

Video

Nominal Video Level 1 Volt p-p
Level Range5 - 2 Volts p-p
Impedance 75 Ohms
Bandwidth 30 MHz (less than $\pm .5$ dB)
Differential Gain <.1%
Differential Phase <.1°
MTBF 30,000 Hours
Video Connectors Female BNC

Audio

Voltage Gain Unity
Frequency Response 20 Hz to 20 kHz
Bandwidth 100 kHz
Maximum Level 10 Volts p-p (unbalanced)
Input Impedance High Z
Output Impedance 50 Ohms (capable of 600 Ohms)
MTBF 30,000 Hours
Connectors 3.5 mm captive screw terminals, 5 conductors

Dimensions

AV DA 6 MX 1.75" H x 8.75" W x 9.5" D
	4.45 H x 22.22 W x 24.13 D cm
AV DA 6 MX DUAL 1.75" H x 17.5" W x 9.5" D
	4.45 H x 44.45 W x 24.13 D cm

Rack Mountable Yes

Shipping Weight

AV DA 6 MX 3.26 lbs. (1.48 kg)
AV DA 6 MX DUAL 8 lbs. (3.63 kg)

Power Supply 100-240 Volts, 50/60 Hz auto-switchable (internal)

Warranty Two years, parts & labor

Part Numbers 60-201-01 (AV DA 6 MX)
60-201-02 (AV DA 6 MX DUAL)

ACCESSORIES

1U, 19" Universal Rack Shelf 60-190-01
BNC - RCA Adapters 10-264-01

SV DA 6 MX

The SV DA 6 MX is a one input, six output S-Video (S-VHS & HI-8) Distribution Amplifier. Compatible with NTSC, PAL or SECAM, the output is split into six different, independently buffered and amplified, outputs and driven up to 150 feet (45 meters).

FEATURES

- Six outputs each individually isolated, buffered and amplified
- Video Input Level: .5 - 2 Volts p-p
- Video Bandwidth: 30 MHz (less than $\pm .5$ dB)
- Inputs and outputs each use professional female 4 pin mini Din
- Metal Enclosure/Internal 100-240 Volt auto-switchable power supply
- Rack Mountable (2 per rack)

SA DA 6 MX SERIES

The three Stereo Audio Distribution Amplifiers in this series are the SA DA 6 MX, SA DA 6 MX DUAL, and the SA DA 6 MX QUAD. Each of these products are compatible with balanced or unbalanced stereo audio. Signals are split into six different, independently buffered and amplified, outputs and driven up to 150 feet (45 meters).

The SA DA 6 MX provides one input and six outputs. The SA DA 6 MX DUAL provides two separate-one input, six output, stereo audio (two channel) distribution amplifiers in one enclosure. Both the CV DA 6 MX & CV DA 6 MX DUAL are rack mountable at 1/2 rack width and 1U high. The SA DA 6 MX QUAD provides four separate-one input, six output, stereo audio (two channel) distribution amplifiers in one enclosure. The SA DA 6 MX QUAD is rack mountable at 1U high (one per rack).

FEATURES

- *Audio Frequency Response: 20 Hz to 20 kHz.*
- *Input Impedance: High Z*
- *Capable of distributing balanced or unbalanced audio signals*
- *Utilizes 5 conductor captive screw terminal connectors (3.5 mm) for inputs and outputs*
- *Metal Enclosure/Internal 100-240 Volt auto-switchable power supply*
- *Rack Mountable*
