What's New

- Supports 1 or 2 AMD Opteron Rev. E processors with 1 GHz HyperTransport Technology

Overview

At A Glance

- **Processors:**
 - AMD 8132 Chipset for PCI-X support and NVIDIA nForce Professional 2200 MCP for PCI Express
- **Memory:**
 - 1 or 2 GB of PC3200 DDR SDRAM running at 400 MHz with Advanced ECC capabilities standard (depending on model), expandable to 16 GB
- **Storage Controller:**
 - Integrated Dual Broadcom 10/100/1000 5721 NICs (Wake on LAN and PXE capable)
 - Embedded SATA Controller
- **Internal Drive Support:**
 - Support for up to two SATA and or SCSI Non Hot Plug hard drives
 - Internal storage capacity of up to 1TB (2 x 500GB non-hot plug 2.5" SATA HDDs), or 292GB (2 x 146GB NHP SCSI HDDs)
- **Network Controller:**
 - Integrated Dual Broadcom 5721 10/100/1000 NICs (Wake on LAN and PXE capable)
- **Expansion Slots:**
 - Two PCI-X 64-bit/133MHz PCI slots operating at 3.3 volts (one full-length/full-height, one low-profile); optional PCI Express x16 in place of full-size slot
- **USB Ports:**
 - Four USB ports (two rear, two front)
- **Optical Drives:**
 - Optional DVD- or CD-ROM drive
- **Power Supply:**
 - 500W Power Supply (Non-Hot Plug, autoswitching)
- **Form Factor:**
 - Rack Mount (1U)
- **Management:**
 - HP ProLiant Lights Out 100i Remote Management standard
 - IPMI 2.0 support
 - ROM Setup Utility
- **Warranty:**
 - Protected by HP Services, including a one-year, limited warranty, Parts only 1 year limited Global warranty - Certain restrictions and exclusions apply.

Standard Features

NOTE: For the Standard Features shipped in the "Factory Integrated Models", please see the "Configuration Information - Factory Integrated Models" section.

Processor One of the following depending on Model	AMD Opteron Model 285 (2.6 GHz/1MB) dual-core processor supporting 1 GHz HyperTransport Technology		
	AMD Opteron Model 275 (2.2 GHz/1MB) dual-core processor supporting 1 GHz HyperTransport Technology		
	AMD Opteron Model 252 (2.6 GHz/1MB) single-core processor supporting 1 GHz HyperTransport Technology		
	AMD Opteron Model 248 (2.2 GHz/1MB) single-core processor supporting 1 GHz HyperTransport Technology		
	AMD Opteron Model 246 (2.0 GHz/1MB) single-core processor supporting 1 GHz HyperTransport Technology

Standard Features

ProLiant Essentials Foundation Pack Software

Optional ProLiant Essentials Value Packs

Optional software offerings that selectively extend the functionality of an Adaptive Infrastructure to address specific business problems and needs:

- Intelligent Networking Pack - detects and analyzes network bottlenecks or broken network linkages and steers traffic to the optimum route based on network conditions, plus it provides an extra layer of protection. The virus throttle feature of the solution slows the propagation of fast spreading virus.
- Rapid Deployment Pack (RDP) is an automated deployment and provisioning solution for all ProLiant servers. RDP includes the ProLiant Integration Module featuring ProLiant server pre-configured events for OS installation, and optimized software drivers, firmware and management agents. Every RDP disc includes 10-node trial licenses for evaluation purposes. RDP requires a license for each server deployed and is available for purchase with HP servers. For more information, visit: <http://www.hp.com/servers/rdp>.
- Vulnerability and Patch Management Pack - identifies and remediates software security vulnerabilities due to missing patches as well as operating system configurations that can be exploited by viruses, worms and other blended threats.

NOTE: Flexible and volume quantity license kits are available for ProLiant Essentials Value Packs. Refer to

<http://www.hp.com/servers/proliantessentials>

or the various ProLiant Essentials Value Pack product QuickSpecs for more information.

Standard Features

Rack Airflow Requirements

Rack 10000 series Cabinets

The increasing power of new high-performance processor technology requires increased cooling efficiency for rack-mounted servers. The 10000 Series Racks provide enhanced airflow for maximum cooling, allowing these racks to be fully loaded with servers using the latest processors.

CAUTION: If a third-party rack is used, observe the following additional requirements to ensure adequate airflow and to prevent damage to the equipment:

Front and rear doors: If your 42U server rack includes closing front and rear doors, you must allow 5,350 sq cm (830 square inches) of hole evenly distributed from top to bottom to permit adequate airflow (equivalent to the required 64 percent open area for ventilation).

Side: The clearance between the installed rack component and the side panels of the rack must be a minimum of 7 cm (2.75 inches)

CAUTION: Always use blanking panels to fill all remaining empty front panel U-spaces in the rack. This arrangement ensures proper airflow. Using a rack without blanking panels results in improper cooling that can lead to thermal damage.

NOTE: For additional information, refer to the Setup and Installation Guide or the Documentation CD provided with the server, or to the server documentation located in the Support section at the following URL: <http://h18000.www1.hp.com/products/servers/proliantdl140/index.html>

Telco Rack Support

Telco Rack Kit:

Support for all 2-post Telco racks requires the use of the standard rack kit and an additional option kit from Rack Solutions.

HP Factory Express Capability

HP Factory Express offers configuration, customization, integration and deployment services for HP servers and storage products. Customers can choose how their factory solutions are built, tested, integrated, shipped and deployed.

Factory Express offers service packages for simple configuration, racking, installation, complex configuration and design services as well as individual factory services, such as image loading, asset tagging, and custom packaging. HP products supported through Factory Express include a wide array of servers and storage: HP Integrity, HP ProLiant, HP ProLiant Server Blades, HP BladeSystem, HP 9000 servers as well as the MSA1000, VA7xxx, EVA, XP, rackable tape libraries and configurable network switches.

For more information on Factory Express services for your specific server model please contact your sales representative or go to <http://www.hp.com/go/factory-express>.

HP Enterprise Configurator

The HP eCo-Enterprise Configurator now provides factory default racking for our HP hardware portfolio. This approach is aligned with our strategic direction to meet the needs and expectations of our valued customers. If you require "custom" rack configuration, please contact HP's Customer Business Center or an Authorized Partner for assistance.

Standard Features

Service and Support

This product is covered by a global limited warranty and supported by HP Services and a worldwide network of resellers and service providers. Hardware diagnostic support and repair is available for three years from date of purchase. Support for software and initial setup is available for 90 days from date of purchase. Additional support may be covered under the warranty or available for an additional fee. Enhancements to warranty services are available through HP Care Pack services or customized service agreements.

NOTE: Server Warranty includes 1 year Parts only. Additional information regarding worldwide limited warranty and technical support is available at:

<http://h18004.www1.hp.com/products/servers/platforms/warranty/index.html>

HP Care Pack services include coverage for the HP branded hardware options qualified for the server, purchased at the same time or afterward, internal to the enclosure, as well as 22" and smaller external monitors and tower UPS options up to 3kVA; these items will be covered at the same service level and for the same coverage period as the server. Coverage of UPS Battery is not included, standard warranty terms & conditions apply. For servers or storage systems installed within a rack, service also covers all HP qualified rack options installed within the same rack.

HP services provide continuous care and support expertise with committed response designed to meet your IT and business needs.

To fully capitalizing on your HP ProLiant servers' capabilities requires a service partner who thoroughly understands your server technology and systems environment. HP Services, an industry leader in provision of multi vender support solutions provides a range of support services designed to meet the varying needs of business. Whether an SMB or large global corporation HP has a ProLiant server support offer to help you speedily deploy and maximize system uptime.

Enhanced Care – Minimum recommended service support offer designed to ensure customers have access to expert assistance, whenever they need it.

- *Next Business Day on site coverage, 3 Years*

Continuance Care – Recommended service, delivering cost-effective support options designed to extend HP Services committed response and guaranteed fix times, designed to speed problem identification and resolution.

- *4-Hour On-site Service, 5-Day x 13-Hour Coverage, 3 Years*

Total Care – Highest HP Support service level recommend to help increase IT performance and availability with comprehensive, integrated hardware and software services

- *4-Hour On-site Service, 7-Day x 24-Hour Coverage, 3 Years*

Deployment Services – HP Installation and Start Up services designed to take time, risk, and worry out of the deployment of ProLiant servers – and free customers IT support staff to focus on what they do best, their business.

- *Installation of a ProLiant server as per Data Sheet. To be delivered on a scheduled basis 8am-5pm, M-F, excl. HP holidays*

HPC Interconnects

NOTE: High Performance Computing (HPC) interconnect technologies are available for the DL145 under the Cluster Platform product portfolio. These high-speed interconnects are fully supported by HP when they are part of these configure to order clusters. Solutions can be defined with a lot of flexibility with the help of configuration tools. Configuration Information - Factory Integrated Models

NOTE: HP does not allow factory integration of options into standard models listed above.

Configure-to-order servers must start with a CTO Chassis.

NOTE: This product offering does not support HP Factory Express Server Configuration Level 1.

NOTE: FIO indicates that this option is a Factory Installable Option.

Step 1: Base Configuration

SCSI Model	HP ProLiant DL145 G2 SCSI Rack Chassis Factory Integrated Model ships with: Integrated Dual Broadcom 5721 10/100/1000 NICs (Wake on LAN and PXE capable) HP U320 Internal SCSI Cable Kit Two available 64-bit/133MHz PCI-X slots, including one full-length/full height and one low-profile/half height slot NOTE: The low-profile/half height slot houses the SCSI HBA when installed. 500 Watt power supply NOTE: Must select HP Low Profile U320 SCSI HBA, (P/N 390402-B21) in Step 2 when selecting the SCSI Rack Chassis, (P/N 378024-405) NOTE: The selection of SCSI Model (P/N 376343-405), requires the selection of (1) SCSI Controller. Please see Step 3 of this section for compatible SCSI Controllers.	378024-405

Memory

NOTE: Memory configurations listed do not apply to "Factory Integrated Models".

HP ProLiant DL145 G2 Single Processor Models

Standard Memory

1 GB (2 x 512 MB) or 2 GB (2 x 1 GB) of PC3200 DDR1 SDRAM running at 400 MHz, with Advanced ECC capabilities Memory installed (depending on model).

Maximum Memory

Up to 16 GB of memory is available with the removal of the standard 512 MB or 1 GB of memory and the optional installation of 2 GB PC3200 Registered ECC DDR1 SDRAM DIMM Memory kits.

Memory Options

The server provides double data rate (DDR) synchronous dynamic RAM (SDRAM) that can improve memory clock speed to at least 400-MHz. It activates output on both the rising and falling edge of the system clock rather than on just the rising edge, potentially doubling output. The server features the following advanced memory technologies:

- 1. Support for up to 16 GB of industry-standard PC3200 registered ECC DDR1 SDRAM memory
- 2. Dual-Channel Memory Architecture

Memory Guidelines

- 1. Bank 1A must always be populated.
- 2. DIMMs must be installed in pairs and starting at the bank farthest from the processor. Populate the SMALLEST DIMMs first.
- 3. If only installing 1 GB DIMMs, ensure that the Dual Rank DIMMs are installed closest to the processor. Dual Rank can be determined by looking for the "2R" or "2Rx8" wording on the label of the DIMM.
- 4. All DIMMs in a bank must have the same part number.
- 5. DIMMs on different banks can be of different sizes.
- 6. Processor 2 must be installed before banks 2A and 2B are populated.
- 7. If processor 2 is installed, it is recommended that bank 2A be populated before populating bank 1B.
- 8. For optimum performance it is recommended that a minimum of banks 1A and 1B be populated in a 2P configuration.

NOTE: Chart does not represent all possible memory configurations.

Memory	Slot							
	1	2	3	4	5	6	7	8
Standard (1 GB)	512 MB	512 MB	Empty	Empty	Empty	Empty	Empty	Empty
Standard (2 GB)	1 GB	1 GB	Empty	Empty	Empty	Empty	Empty	Empty
Maximum (16 GB)	2 GB	2 GB	2 GB	2 GB	2 GB	2 GB	2 GB	2 GB

Following are memory options available from HP:

1 GB Advanced ECC PC3200 DDR1 SDRAM DIMM Memory Kit (2 x 512 MB)	376638-B21
2 GB Advanced ECC PC3200 DDR1 SDRAM DIMM Memory Kit (2 x 1 GB)	376639-B21
4 GB Advanced ECC PC3200 DDR1 SDRAM DIMM Memory Kit (2 x 2 GB)	379300-B21
