

MCK Communications develops and markets distributed voice solutions that cost-effectively create a more open and interconnected business telephony environment. MCK solutions provide enterprises with extended business reach, lowered communications costs, and options for flexible migration to next-generation environments, while empowering individuals with portable business telephony.

MCK extends PBX features and functionality to remote locations including:

- Teleworkers
- Call Centers
- Branch offices
- Mobile Workers

MCK EXTender™ 7000

- Converged voice and data solution
- Delivers the power of the PBX to remote branch offices
- Offers the security of WAN survivability and robust local calling capabilities
