As a leading provider of TDM and IP-based telephony products, MCK is helping distributed enterprises leverage existing telecom investments to improve efficiency, lower costs and reduce network complexity, without sacrificing quality of service. MCK's EXTender line of IP enabler telephony products extends the features and applications of central office PBX/KTS systems to branch offices, call centers, teleworkers and mobile workers by enabling a seamless, unified corporate telephony network. With MCK's EXTender products, enterprises have the power to:

- Extend the life of TDM-based telecom investments
- Migrate to IP telephony using existing TDM-based PBX/KTS systems
- Gain IP cost efficiencies on the WAN
- Simplify voice network implementation and management
- Provide a familiar user interface to everyone who touches your business

### MCK EXTender™ 7000

- Converged voice and data solution
- Delivers the power of the PBX to remote branch offices
- Offers the security of WAN survivability and robust local calling capabilities

### MCK EXTender™ 7000 for Branch Offices
