

SonicWALL Content Security Manager 2100 CF

CONTENT SECURITY

Dynamic Threat Protection and Internet Filtering

- **Real-time gateway anti-virus and anti-spyware scanning**
- **Powerful Internet filtering**
- **Instant messaging (IM), peer-to-peer (P2P) and multimedia controls**
- **Seamless integration behind virtually any firewall**
- **Granular policy control via single sign-on**
- **High availability**
- **Powerful Web-based reporting**

In today's business environment organizations rely increasingly on the Internet for access to information and resources. While instant access to information over the Internet is critical, it introduces incredible risk to networks and data. Every day, new threats such as viruses, worms, Trojans, phishing attacks and spyware programs cause serious financial damage to companies through data deletion, loss of productivity and bandwidth consumption. The opportunity to connect to Web sites that contain information and images that are objectionable or even illegal can leave organizations vulnerable to legal liabilities and unwanted security risks. Additionally, the use of instant messaging (IM) and peer-to-peer (P2P) applications compete for employees' time and can result in tremendous losses in productivity.

The SonicWALL® Content Security Manager 2100 Content Filter (CSM 2100 CF) is an appliance-based Internet filtering solution that integrates real-time gateway anti-virus, anti-spyware and Internet filtering to deliver maximum network protection from today's sophisticated Internet threats. Combining dynamic threat management capabilities with precise control over Internet usage in an affordable, appliance-based solution, the CSM 2100 CF boosts network security and employee productivity, optimizes network utilization and mitigates legal liabilities. This unique solution integrates seamlessly into virtually any network topology for powerful, scalable and cost-effective threat protection.

Utilizing the high-performance SonicWALL deep packet inspection architecture, the CSM 2100 CF eliminates malicious Internet threats before they can infect the network. At the same time, the CSM 2100 CF provides granular controls that enable network administrators to manage access to Web sites containing inappropriate, unproductive and potentially illegal Web content. To complete the solution, the CSM 2100 CF includes advanced graphical reporting and analysis tools, offering administrators granular insight into network usage.

Features and Benefits

Real-time gateway anti-virus and anti-spyware scanning over a multitude of widely-used protocols and ports delivers complete protection by eliminating viruses, worms, Trojans, spyware and other Internet threats at the gateway before they can infect the network.

Powerful Internet filtering provides granular, policy-based controls to manage access to inappropriate, unproductive and potentially illegal Web content.

Instant messaging (IM), peer-to-peer (P2P) and multimedia controls improve network performance, block security threats and protect against legal liabilities.

Seamless integration behind virtually any firewall enables organizations to leverage the existing network infrastructure without the need to purchase additional hardware.

Granular policy control via single sign-on streamlines user authentication and the management of access to network resources and online content.

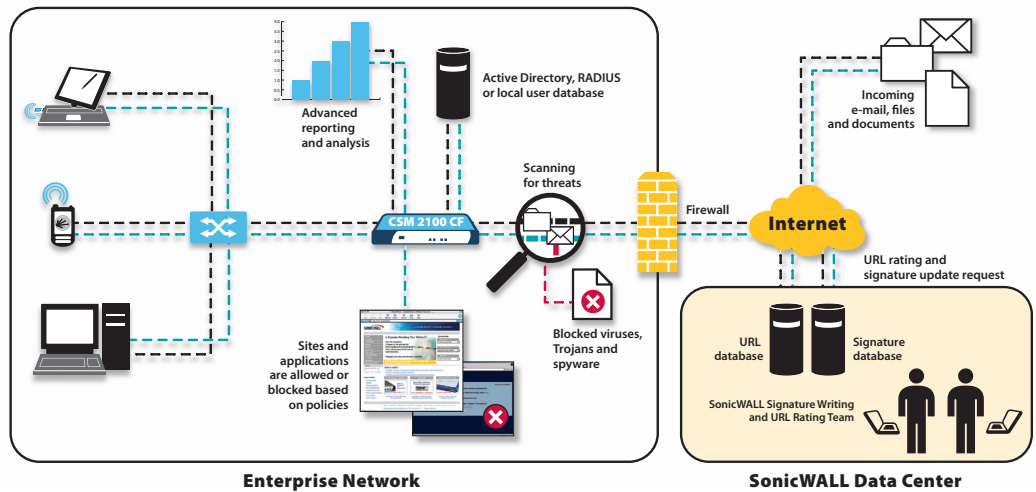

High availability ensures the network is always protected and productivity remains uninterrupted by automatically failing over to a secondary CSM 2100 CF should the primary unit fail.

Powerful Web-based reporting provides greater insight into network usage through custom reports that can be viewed in multiple formats.

Architecture

SonicWALL Content Security Manager 2100 Content Filter

SonicWALL Content Security Manager 2100 CF

Content Security Manager 2100 CF (includes 1YR of 25-user Update Service) US/Canada 01-SSC-6000

Content Security Manager 2100 CF (includes 1YR of 25-user Update Service) International 01-SSC-6001

Content Security Manager 2100 CF Update Service (25 Users) 01-SSC-6006

Content Security Manager 2100 CF Update Service (50 Users) 01-SSC-6007

Content Security Manager 2100 CF Update Service (100 Users) 01-SSC-6008

Content Security Manager 2100 CF Update Service (250 Users) 01-SSC-6009

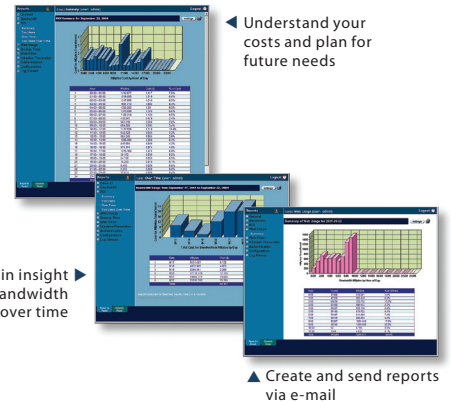

Content Security Manager 2100 CF Update Service (500 Users) 01-SSC-6010

Content Security Manager 2100 CF Update Service (1,000 Users) 01-SSC-6011

The Content Security Manager 2100 CF includes advanced reporting and analysis tools that provides greater insight into network usage through custom Web-based graphical reports.

Create real-time and historical reports based on:

- Category
- Users
- Destination
- Return on Investment (ROI)
- Productivity

Feature List

| | |
|--------------------------------------|---|
| Virus Scanning Capabilities | <ul style="list-style-type: none"> ■ SMTP, POP3, IMAP, HTTP, FTP, NetBIOS ■ Instant messaging and peer-to-peer file transfers; multimedia applications ■ Dozens of stream-based protocols |
| Threat Protection | <ul style="list-style-type: none"> ■ Protection against viruses, worms, Trojans, software vulnerabilities such as buffer overflows, as well as peer-to-peer and instant messenger applications, backdoor exploits and other malicious code |
| Scalability | <ul style="list-style-type: none"> ■ Able to scan thousands of concurrent downloads of any file size |
| Signature Database | <ul style="list-style-type: none"> ■ Dynamically-updated database containing thousands of attack, vulnerability and high threat virus signatures |
| URL Database | <ul style="list-style-type: none"> ■ Comprehensive, continuously updated ratings database featuring millions of Web sites and domains |
| Logging and Reporting | <ul style="list-style-type: none"> ■ Real-time logging and alerting ■ Granular reports through SonicWALL ViewPoint™ and Global Management System |
| Supported Compression Formats | <ul style="list-style-type: none"> ■ ZIP, Deflate and GZIP |
